## **CORPORATE ENVIRONMENTAL POLICY**

### **1. Introduction**

L'Aprochimide S.r.l. recognizes the strategic importance of environmental protection as a driver of value, responsibility, and competitiveness. With this in mind, the company adopts a systemic and proactive approach to environmental management, aimed at preventing pollution, reducing environmental impacts, and continuously improving its performance.

### **2. Scope of Application**

This Environmental Policy applies to all activities, processes, facilities, and operating locations of L'Aprochimide S.r.l., as well as to suppliers, contractors, business partners, and collaborators working on the company's behalf. It involves all personnel, from employees to managers, and extends its principles to relevant stakeholders (customers, local communities, public bodies) through information and collaborative activities.

### **3. Allocation of Responsibilities**

The General Management is responsible for strategically defining environmental objectives and reviewing this Policy. It also oversees its operational implementation in collaboration with the Sector Managers.

All employees, collaborators, and partners are required to comply with environmental principles. Individual and collective environmental performance will be periodically evaluated.

### **4. Environmental Objectives**

L'Aprochimide S.r.l. is committed to:

- Responsibly using natural and energy resources, reducing waste and encouraging the use of renewable sources;
- Reducing waste generated by business processes;
- Preventing accidental events and safeguarding health;
- Properly managing chemicals and any hazardous waste, in compliance with regulations and minimizing their impact;

- Prevent all forms of environmental pollution (air, water, soil) through regular monitoring of emissions, discharges, and noise;
- Protect biodiversity and promote the regeneration of local ecosystems where possible;
- Monitor energy, water, and raw material consumption;
- Define and monitor measurable environmental objectives annually, with quantitative targets and verifiable timelines;

The environmental segment of the Ecovadis assessment is used to monitor progress and achievement of objectives.

## **5. Environmental Risk Management**

L'Aprochimide S.r.l. has developed an Environmental Risk Matrix, which considers:

- soil and water pollution risk;
- air emissions risk;
- noise pollution risk;
- fire/explosion risk;
- energy consumption/low efficiency risk;
- biodiversity impact risk.

## **6. Supply Chain Involvement**

L'Aprochimide S.r.l. integrates environmental criteria into supplier selection, evaluation, and monitoring. Sustainable practices are promoted through:

- Request for adherence to environmental codes of conduct or standards (e.g. ISO 14001);
- Annual environmental assessments;
- Environmental audits for critical or high-risk suppliers.

## **7. Monitoring, Audit, and Improvement Mechanisms**

This Policy is reviewed in the event of significant regulatory, technological, or organizational changes.

The Environmental Management System includes:

- Monitoring of environmental KPIs with trend analyses;

- Sustainability reports or internal environmental reports with results and corrective actions;
- Preventive and corrective actions following non-compliance or environmental incidents.

## **8. Communication and Transparency**

The Environmental Policy is:

- Disseminated internally through internal documentation;
- Published on the company website and in official documents;
- Communicated to suppliers and business partners during the selection process, particularly those providing transportation services (land and sea);
- Available upon request to customers, public bodies, local communities, and interested stakeholders.
